Project Planning Phase

Project Planning Template (Product Backlog, Sprint Planning, Stories, Story points)

Date	18 October 2026
Team ID	[Enter Team ID]
Project Name	Global Fuel Prices and Taxation Analysis (2020 to 2026)
Maximum Marks	8 Marks

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Regional Comparison	USN-1	As a policy consultant, I can view a map of average fuel tax by country so that I can see which countries tax fuel the most.	3	High	[Team Member 1]
Sprint-1	Tax and Subsidy	USN-2	As a policy consultant, I can compare average tax by region and subsidy level so that I can spot policy gaps.	2	High	[Team Member 2]
Sprint-1	Subsidy Impact	USN-3	As a policy consultant, I can compare fuel price across subsidy levels so that I can see how subsidies affect price.	2	High	[Team Member 3]
Sprint-1	Price Forecast	USN-4	As a supply chain manager, I can see diesel price trends with a forecast so that I can plan fuel purchases.	4	High	[Team Member 4]
Sprint-1	Market Ranking	USN-5	As a supply chain manager, I can see the 10 most and 10 least expensive countries so that I can choose favorable markets.	2	High	[Team Member 1]
Sprint-2	Price Risk	USN-6	As a supply chain manager, I can see price volatility by region and year so that I can find unstable markets.	3	Medium	[Team Member 2]

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-2	Income Analysis: Tax	USN-7	As a researcher, I can compare average tax across income levels so that I can test whether richer countries tax fuel more.	2	High	[Team Member 3]
Sprint-2	Income Analysis: Subsidy	USN-8	As a researcher, I can see the share of each subsidy level within each income group so that I can judge affordability support.	3	High	[Team Member 4]
Sprint-2	Income Analysis: Price	USN-9	As a researcher, I can compare petrol, diesel and LPG prices by income level so that I can study affordability.	2	Medium	[Team Member 1]
Sprint-3	Filtering	USN-10	As a user, I can filter all charts by year so that I can look at one period.	2	Medium	[Team Member 2]
Sprint-3	Click-to-Filter	USN-11	As a user, I can click a country or region on the map so that the other charts focus on it.	3	Medium	[Team Member 3]
Sprint-3	Reporting	USN-12	As an administrator, I can refresh the data and export the dashboard as an image or PDF so that I can share results.	2	Low	[Team Member 4]

Project Tracker, Velocity & Burndown Chart: (4 Marks)

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	13	6 Days	19 Oct 2026	24 Oct 2026		
Sprint-2	10	6 Days	26 Oct 2026	31 Oct 2026		
Sprint-3	7	6 Days	02 Nov 2026	07 Nov 2026		

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)

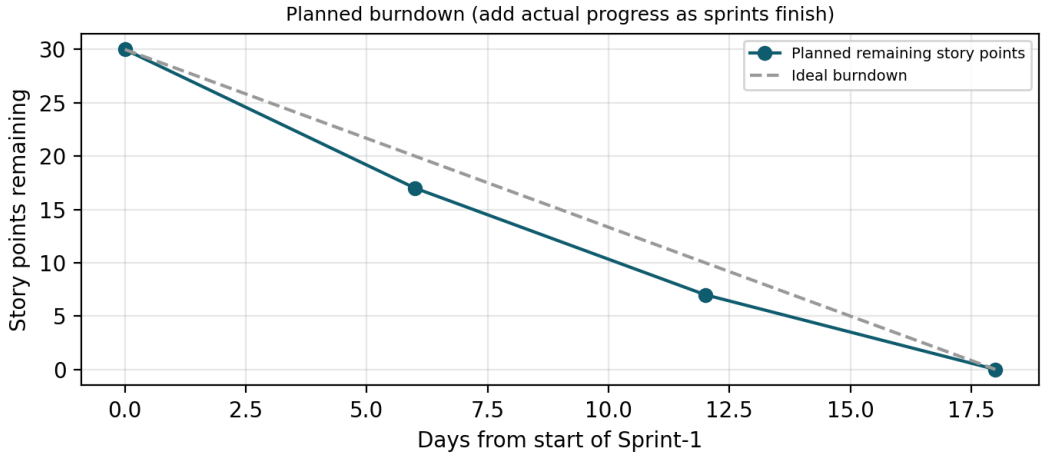

Velocity:
Imagine we have a 10-day sprint duration, and the velocity of the team is 20 (points per sprint). Let's calculate the team's average velocity (AV) per iteration unit (story points per day)

$$AV = \frac{sprint\ duration}{velocity} = \frac{20}{10} = 2$$

Our sprints last 6 days and the team plans 30 story points over 3 sprints (13, 10 and 7), an average velocity of 10 points per sprint. Average velocity per day = 10 / 6 = 1.67 story points per day.

Burndown Chart:

A burn down chart is a graphical representation of work left to do versus time. It is often used in agile software development methodologies such as Scrum. However, burn down charts can be applied to any project containing measurable progress over time.
