Project Name	Global Fuel Prices and Taxation Analysis (2020 to 2026)
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes. It helps participants consider things from the user's perspective along with his or her goals and challenges.

Reference: https://www.mural.co/templates/empathy-map-canvas

SAYS

- "Which countries tax fuel the most?"
- "Do subsidies really keep prices low?"
- "I need numbers I can show to ministers."

THINKS

- Is our tax policy fair across income groups?
- Can we cut subsidies without hurting people?
- Will this evidence convince stakeholders?

Dr. Sarah Mitchell *(Energy Policy Consultant)*

DOES

- Compares tax and subsidy rates by region
- Builds policy briefs and presentations
- Checks data from several sources by hand

FEELS

- Pressured to justify every recommendation
- Uncertain when data is scattered
- Confident when a clear chart backs a point

Empathy Map 2

SAYS	THINKS
• "Where is diesel cheapest right now?" • "What will prices do next year?" • "Which regions are the riskiest?"	• Am I overpaying for fuel in some markets? • Can I plan purchases before prices rise? • Will volatility break my budget?
Marcus Thompson *(Global Supply Chain Manager)*	
DOES	**FEELS**
• Compares fuel prices by country and region • Reviews price trends and forecasts • Adjusts routes and buying plans	• Worried about sudden price swings • Frustrated by missing forecasts • Relieved when trends are easy to read

Empathy Map 3

SAYS • "Do rich countries tax fuel differently?" • "Are subsidies helping poorer countries?" • "I need patterns I can publish."		**THINKS** • Is fuel affordable in developing economies? • Does tax rise with income or not? • Is the data reliable enough to cite?
	Prof. Elena Rodriguez *(Energy Economics Researcher)*	
DOES • Groups countries by income level • Looks for correlations and outliers • Writes up findings for papers and reports		**FEELS** • Curious when a pattern appears • Frustrated by manual data cleaning • Motivated by clear evidence
